

# Ajay Pawar

Software Engineer — Pune, Maharashtra

mrajaypawar207@gmail.com — +91-8605234701 — LinkedIn — GitHub — LeetCode

## Summary

---

Software Engineer and Full Stack Developer with experience in building scalable, secure, and maintainable web applications. Proficient in developing end-to-end solutions across frontend, backend, and database layers using React, Node.js, Firebase, Java, and SQL. Hands-on experience with authentication, role-based access control, API design, and data modeling. Strong understanding of software engineering principles, system design, and delivering reliable solutions in production environments.

## Technical Skills

---

- **Frontend:** React.js, JavaScript (ES6+), HTML, CSS, Tailwind
- **Backend:** Node.js, Express.js, REST APIs, Java (Core Java, OOP)
- **Databases:** PostgreSQL, MongoDB, Firebase Firestore
- **Auth & Security:** Firebase Authentication, Role-Based Access Control
- **System Design:** Modular architecture, data modeling, API design, state management
- **Dev Tools:** Git, GitHub, Agile workflows, debugging, deployment

## Experience

---

### Software Engineer / Full Stack Developer

Aug 2024 – Present

Gryphon Academy Pvt. Ltd., Pune

- Designed and developed full-stack web applications used by students, faculty, and administrators
- Built React-based dashboards with secure authentication and role-based access
- Developed backend logic and APIs to handle workflows, approvals, and data integrity
- Designed relational and NoSQL databases for scalable academic and administrative systems
- Worked closely with non-technical stakeholders to convert real-world processes into software
- Owned features end-to-end: requirement analysis, development, testing, and deployment

### Web Developer Intern

Jan 2024 – Jul 2024

Gryphon Academy Pvt. Ltd., Pune

- Assisted in building and maintaining React-based web modules
- Worked on data validation, UI logic, and bug fixing across multiple systems
- Gained hands-on exposure to production codebases and real user workflows

## Projects

---

### Leaving Certificate Management System – ICEM Pune

- Built a full-stack production system for issuing official leaving certificates
- Implemented secure authentication and role-based access for staff and administrators
- Designed database schemas for students, approvals, and certificate records
- Ensured data accuracy, traceability, and compliance with institutional requirements
- **Tech:** React, Node.js, PostgreSQL, Firebase Auth

### Procurement Workflow Automation Platform

- Digitized end-to-end procurement workflows replacing manual paper processes
- Implemented multi-level approval logic and real-time status tracking
- Designed audit trails and budget validation to prevent invalid requests
- **Tech:** React, Node.js, PostgreSQL

### EdTech CRM Web Application

- Developed CRM features for lead management, dashboards, and reporting
- Worked with Firebase Firestore for real-time data handling
- Implemented role-based views for sales and admin users
- **Tech:** React, Firebase, JavaScript
